GAEU's clients winners at the premiere of the EIC Accelerator Pilot

GAEU's clients became the big winners at the premiere of the newly expanded EU grant program for the most innovative SME companies – EIC Accelerator Pilot Phase 2 (formerly the SME instrument). GAEU wrote the EU applications for two of the three Swedish companies that were granted. Together, the clients received a total of EUR 4.1 million. The life science company Colzyx from Medicon Village Science Park, received the most; EUR 2.5 million. The company has developed a groundbreaking innovation for wound management.

Dr. Eskil Söderlind, CEO of Colzyx AB (awarded EUR 2.5 million) comments:

“Colzyx has used GAEU for both the Phase 1 SME Instrument and the Phase 2 Accelerator – both applications were granted. We have found GAEU to be very professional, dedicated and skilled. In addition, the atmosphere in collaboration with GAEU has been characterized by openness and a strong commitment to creating the best possible project proposals.”

Roland Vilhelmsson, CEO of GAEU Consulting:

“In short, our method is based on three cornerstones. First, we ensure that the applicants represents a strong team and cutting-edge innovative technology with significant international market potential. We then appoint technical experts and experts in business development from our competence center in Kraków to the project. In close cooperation, an optimal implementation plan then materialize, which is presented in a competitive EU application.”
